

International Master on Urban Transformation and Sustainable Development Program at the Construction Innovation and Sustainable Engineering Consortium at the Politecnico di Milan

Código de Beca: 1400

Nombre: International Master on Urban Transformation and Sustainable Development Program at the Construction Innovation and Sustainable Engineering Consortium at the Politecnico di Milan

Descripción:

ABOUT THE PARTNER INSTITUTIONS

The OAS General Secretariat (GS/OAS) is the central and permanent organ of the Organization of American States (OAS).

Through its Department of Human Development, Education and Employment (DHDEE), GS/OAS supports OAS member States in creating policies and executing programs that promote human capacity development at all educational levels.

By enabling formative opportunities to citizens, DHDEE strengthens democratic values and security under the framework of regional integration.

DHDEE does this: (i) by supporting the efforts of OAS member states to improve the quality of and equity in education; and (ii) by assisting the citizens of the Americas in realizing their full potential by giving them access to knowledge and skills through training that improves the standard of living for individuals, families and communities in the region.

The Construction Innovation and Sustainable Engineering Consortium at the Politecnico di Milan (CISE POLIMI)

Politecnico Milano is a scientific-technological university which trains engineers, architects and industrial designers.

The University has always focused on the quality and innovation of its teaching and research, developing a fruitful relationship with business and productive world by means of experimental research and technological transfer.

The alliance with the industrial world, in many cases favored by Fondazione Politecnico and by consortiums to which Politecnico belong, allows the university to follow the vocation of the territories in which it operates and to be a stimulus for their development.

Politecnico takes part in several research, sites and training projects collaborating with the most qualified European universities.

Politecnico's contribution is increasingly being extended to other countries: from North America to Southeast Asia to Eastern Europe.

Today the drive to internationalization sees Politecnico Milano taking part into the European and world network of leading technical universities and it offers several courses beside many which are entirely taught in English.

- Fuente principal:** Organización de los Estados Americanos
- Fuente secundaria:** -
- Tipo de beca:** Parcial
- Fecha de vencimiento:** 01/03/2019
